Qty(3) Electronic Boards in parallel provide immediate Safety Back-up!

***Multi-Board Safety Back-up Design:** The unique Carlisle & Finch design has multiple electronic boards connected in parallel which provide built-in redundancy. If a board fails, the searchlight will still operate in “back-up” mode. And when there is a board failure, an indicator light on the control panel warns the operator that the light is in “back-up mode”, and that the board should be replaced. This feature insures greater searchlight reliability, and is offered by no other searchlight company in the world. Other searchlights, have a complete outage, if an electronic board fails!
